

Pre-Screen Questionnaire

Complete Recycling specializes in designing customized recycling programs for businesses in the industrial sector. Our programs educate clients on diverting recyclables from their waste stream, which helps eliminate middlemen and local trash and recycling haulers. Complete Recycling helps clients generate the greatest possible revenue by teaching them how to package their recyclables so that they can be shipped directly to a recycling consumer, such as a paper or plastics mill.

In order to maximize value, special equipment may be needed to properly package your recyclables. Complete Recycling has designed an equipment finance program that allows our clients to use the revenue generated from their own recycling program to pay for equipment, which means the client bears no out-of-pocket expense.

The following is a few questions that help us determine whether a prospective client is a good match for Complete Recycling's services. Please fill out the questionnaire and return by e-mail to info@completerecycling.com.

🔄 What types of items does your waste or byproduct primarily consist of? Examples of recyclable items include corrugated cardboard, plastic film or stretch wrap, plastic buckets, metal and more.

🔄 How is your waste currently handled?

🔄 What types of containers are located at your facility?

🔄 How often are your waste containers picked up?

🔄 On average, how heavy are the containers? (This information should be included with every invoice submitted by your current vendor.)

🔄 Does your facility currently operate any balers or have any experience with this type of equipment?

🔄 Your information:

Name: _____ E-mail: _____

Company: _____ Phone: _____

Address: _____

Best way and time to reach you: _____
